

Do solar home systems reduce energy consumption in Kenya?

Pipeline comparison analysis of solar home systems on energy consumption in Kenya. Results show an increased use of LED lamps, reduction in dirty lamps and kerosene. Increased satisfaction results from better lighting and more time for TV watching. Changes in energy use and phone charging lead to monthly savings of EUR 1.60.

What is the market share of solar lights in Kenya?

As discussed earlier, portable solar lights and SHS which offer up to 10 watts of peak power dominate the market in Kenya and represent 90% of products sold (Lighting Global and GOGLA, 2016). Households with such systems comprise only 68% of our sample.

Is Solar TV a good option for households in Kenya?

Regionally, the households are located in the Central, Southern and Western parts of the country. Hence, the affordability and the viability of using SHS such as the Solar 4 or Solar TV is restricted to somewhat better off households and we cannot draw any conclusions for households located in Northern and North-eastern Kenya.
