

How much solar power does Kosovo have?

With regard to solar power, Kosovo's installed capacity at the end of 2020 stood at 20,9MW, the bulk of which are sited at agricultural facilities throughout the country. However, a few recently announced solar power projects are poised to increase that number significantly.⁹

Will a 150-megawatt solar farm be built in Kosovo?

PRISTINA, May 19 (Reuters) - A group of international and local investors have started to build a 150-megawatt (MW) solar farm in western part of Kosovo as the Balkan country is trying to phase out its dependence from coal. The Solar Energy Group Europe (SEGE) consortium plans to start production within 12 months.

Can Kosovo transform its energy system to a lower carbon paradigm?

In this regard, the Republic of Kosovo stands at a crossroads: as a small, landlocked country in the heart of South East Europe, it has tremendous potential to transform its energy system toward a lower carbon paradigm.

How can development finance support solar PV projects in Kosovo?

Many of the solar PV projects currently being developed in Kosovo have benefitted from support from development finance institutions such as the EBRD or the IFC. Indeed, the role of DFIs has arguably been instrumental in helping catalyse investment, and in building other lenders' confidence in providing loans to the sector.

How can Kosovo improve its solar and wind power system?

As Kosovo increases the share of solar and wind, it will need to put far greater emphasis on power system integration and on other aspects such as real-time weather forecasting in order to better govern the transition while maintaining reliability.

Is Kosovo paving the road for a greener and environmentally friendly future?

“By harnessing the potential of clean energy, we are paving the road for a more greener and environmentally friendly future,” Kosovo's Prime Minister Albin Kurti said during a ceremony marking the construction of the plant close to western town of Gjakova.
