?????

What is Fisonic Device? The Fisonic Devices (FDs) are supersonic, condensing heat pumps with a patented internal geometry which causes steam and water to mix and accelerate, converting a minute fraction of fluid's thermal energy to physical trust (pump head) with the outlet pressure higher than the pressure of the working medium at the inlet of the device.

Fisonic commercial heating systems easily replace your existing system and can be installed without disrupting building services. Our systems deliver a wide range of operational, ...
