

How can we improve energy data collection in Kuwait?

This could be facilitated through more coordination and collaboration between energy players within Kuwait and improving the institutional capacity for data collection. The lack of collaboration and expertise contribute to long delays in receiving feedback and data from energy entities. The situation, however, is expected to improve.

Is Kuwait facing a changing energy world?

Kuwait, like all oil-producing countries, is facing a changing energy world today. Shifting supply, demand and technology trends have ushered in an energy world where oil-price volatility and market uncertainty are the defining features.

Should Kuwait reevaluate its power generation and desalination plans?

Environmental considerations, cost reductions in renewable energy technologies and higher than expected growth in electricity and water demand could persuade Kuwait to reevaluate its current expansion plans for the power generation and desalination sectors, particularly if MED and RO technologies prove to be more efficient and reliable.

Does Kuwait need a new energy strategy?

To ensure economic development and social prosperity in the years to come, Kuwait will require a new energy strategy, combined with a plan to foster economic diversification and reduce fossil fuel dependency.

How can Kuwait keep pace with rising demand for electricity?

Keeping pace with rising demand for electricity will be critical to Kuwait's economic development, and reforms, such as opening up the power generation sector to independent power producers and independent water and power producers, are key to increasing the currently low share of private company involvement in the sector.

Is Kuwait a natural gas exporter or importer?

Today, Kuwait relies almost exclusively on oil products and natural gas to meet its energy needs, with each fuel accounting for about a half of total primary energy consumption. But while Kuwait is a major oil exporter, it is a net importer of liquefied natural gas, due to underdevelopment of its gas reserves.
