

Kyoto group as Slovenia

Who is Kyoto Group?

Kyoto Group is a Norwegian company founded in 2016 to capture and manage the abundant energy from the sun and wind, and apply it to reduce the CO2 footprint for industrial process heat. Join our mailing list. Kyoto produces a thermal battery, Heatcube, which replaces oil, gas or diesel burners currently on site, and is charged using electricity.

How can Kyoto Group help businesses achieve sustainability goals?

Kyoto Group can play a vital role in helping businesses to achieve their sustainability goals and contribute to the UN Global Compact's efforts to promote sustainable and responsible business practices.

Why do people work at Kyoto Group?

That is why the people now working at Kyoto Group, and the people yet to come, have a luxury. The feeling of actually doing something useful to prevent the threat of global warming. "No tank holds the wind. We don't control the weather. The wind may spin a wind turbine blade, and the sun may shine on a solar cell.

Esta es la misi3n de Kyoto Group. Estamos construyendo una bater3a t3rmica para dar a la industria esa opci3n. Calor generado sin combusti3n, solo electricidad. En el momento en el que la electricidad es barata. La mitad del consumo de energ3a en la industria se usa para producir calor y la mayor3a proviene de combustibles f3siles.

Kyoto Group said last week (11 August) that a successful Initial Operations Test (IOT) has been carried out by the technology provider with Nordjyllandsværket, which it said showed the Heatcube and its components and processes including flow heater, salt circulation, steam generator and safety functionality were working properly.
