

What are the opportunities for the energy sector in Afghanistan?

The opportunities for the energy sector are summarized in the following key four categories: Sufficient Renewable Energies: There is significant renewable energy production potential in Afghanistan such as hydropower, solar, and wind energies. Non-Renewable Energies: Fossil fuel such as natural gas, oil and coal resources.

What is the energy potential of Afghanistan?

The resources are sufficient to fundamentally change the country energy, economy and security situation (Risen, 2010). Hydroelectric power potential of Afghanistan is estimated in excess of 23,000 MW¹ along with excessive solar and wind energy potential (DABS, 2011).

Why is Afghanistan importing electricity?

Import electricity Afghanistan is in the near vicinity of energy rich countries of central Asia. After the removal of the Taliban government in 2001 the new Afghan government has given priority to import power as the fastest way to bring electricity to the capital Kabul and country as a whole.

Where does Afghanistan's electricity come from?

Afghanistan indigenous resources have remained untapped and very little focus has been given to internal electricity production. The government from last 14 years has mainly focused on import power from neighboring countries. And currently around 80% of Afghanistan electrical energy comes from import resources (ADB, 2015).

Can Afghanistan overcome the legacy of the past?

However, today there are opportunities to overcome the legacy of the past and seize the vicious circle of economic regressions and political violence into enhanced political stability and economic development. Afghanistan has sufficient energy resources to provide reliable electricity to its people and industries.

Is Afghanistan ready for energy self-sufficiency?

A preliminary technical survey estimated Afghanistan hydropower potential in excess of 23,000 MW (DABS, 2011). This is a promising sign for Afghanistan energy self-sufficiency considering the estimated 3500 MW of electricity demand of Afghanistan in 2032.
