What is lundsby renewable solutions?

Lundsby Renewable Solutions is more than just a name. It is our promise that - together with you - we will make both ends of green transition meet and contribute to a future, where more will live in a greener way on our blue planet. A future, where we turn natural resources into sustainable energy. And this future...is right now!

Why did lundsby renewable solutions change its name?

In 2022, the name changed into Lundsby Renewable Solutions, one of the reasons being the intention of exploiting the company's international potential to the maximum. Lundsby has more than 25 years of experience with designing and building turnkey biogas plants.

Where is lundsby constructing a biogas plant?

Lundsby is currently constructing a biogas plant for Gasum i Gästene, Sweden, that becomes operational in early 2025. It will be capable of covering the annual energy consumption for heating and electricity for approx. 6,000 households, or the annual consumption for... At full capacity, the biogas plant will be one of the largest plants in Europe.

How did lundsby help the biogas plant?

Lundsby has been associated with the biogas plant during the start-up phase and helped to ensure the right start-up. Lundsby also made sure to have a good introduction made for our employees, who must look after the plant daily. Mads Nør Kristensen, Director and co-owner Grauballegaard Biogas

How can lundsby help you in the green transition?

If you wish to play an active role in the green transition by using biomass from agriculture, households, industry, etc., we help you make all ends meet and turn the idea into reality. Lundsby has more than 25 years of experience with developing and providing efficient biogas plants.

Why should you choose lundsby?

Lundsby provides a reliable plant and also helps you to commission the plant well and safely. The good cooperation with our customers and partners ensures that we keep our know-how updated, so we can always develop and optimise our solutions. To your benefit and to the benefit of your economy and the green transition.

El material orgánico que ha pasado por digestión anaerobia mantiene todos sus nutrientes y, por lo tanto, es un fertilizante valioso. Sin embargo, muchas veces las plantas de biogás están alejadas de los terrenos agrícolas, en estos casos, el tratamiento del digestato (separación de sólidos) ayuda a optimizar el contenido de nutrientes antes de ser transportado.

Lundsby Renewable Solutions A/S har underskrevet en EPC-kontrakt vedr. design og konstruktion af et 133 GWh biogasanlæg i Borlänge, Sverige for energivirksomheden Gasum. Anlægget vil, ved fuld kapacitet, omdanne cirka 300.000 tons grønt, bæredygtigt råmateriale - landbrugs- og industrielt organisk affald - til cirka 12 mio.
