

Is Luxembourg ready for a green energy transition?

Renewable energies are constantly on the rise, steadily gaining ground on the path to energy transition. Luxembourg is on the right track to reach its objective with its green energy development support project, 'Gréng relance fir Lëtzebuerg '.

What is the energy consumption pattern in Luxembourg?

Also the industrial energy consumption pattern is unique, with the steel industry consuming nearly 40% of the national electricity. Lacking fossil fuels, Luxembourg depends on external energy imports, be it oil or natural gas, making it reliant on a robust and competitive European energy market.

What is the electricity generation capacity in Luxembourg?

Table I lists the current and projected future electricity generation capacity in Luxembourg for different energy sources. Already today, the majority of the capacity comes from renewable sources, including solar, wind, hydro, biogas, and biomass, totaling a maximum installed generation of 553 MW (471 MW for solar and wind).

Is Luxem-bourg a good country?

One advantage of a small, high-GDP country like Luxem-bourg is its agility: with a continuous government support and the right policy implementation, it can transition from a poorest performer to a leader in just a few years. Luxembourg's Integrated National Energy and Climate Plan for 2021-2030 (NECP) embodies this ambition.

How a smart meter & IoT device can help Luxembourg?

The increasing penetration of smart meters (more than 95% of the households are equipped in Luxembourg) and IoT devices provide vast amounts of data that can be used to build accurate production and consumption forecasts, helping to balance the grid, avoid peak demands, and optimize the use of the existing infrastructure.

R.Power Renewables Signs Long-Term PPA with Global Fashion Company H& M Group ? ? We are proud to share that we have just signed a long-term Power Purchase Agreement with global fashion company H& M Group. Key highlights of the partnership: - Long term agreement to supply clean, renewable solar energy - Approximately 50 GWh yearly of green energy to power ...
