How much solar energy is available in Malaysia?

A total of 1492.12MWof installed capacity has been in operation from the four cycles of the LSS programme as of August 2023. A further 949.09MW of solar PV capacity has been awarded under the programme but is yet to be operational. Despite the progress, there are still challenges facing the development of solar energy in Malaysia.

Why is Malaysia promoting solar energy development?

Malaysia has shown a strong commitment to promoting solar energy development since the introduction of the National Renewable Energy Policy in 2010. This commitment has proven fruitful by the significant rise in operational solar PV installations over the last 13 years.

Should Malaysia invest in solar energy?

The clean energy market in Malaysia's energy sector is still in its infancy and remains underdeveloped. As a result, it would need massive investment to get up and running. According to IRENA, by 2030, Malaysia would need around USD 10.8 billionin investment for solar PV alone.

What is Malaysia's solar power potential?

According to IRENA, Malaysia has the potential to install 153 GWof solar energy by 2050, supported by 782 GWh of storage. Tapping into this potential will help Malaysia reach its renewable targets. Malaysia Solar Power Potential, Source: IRENA

Will solar power boost clean power in Malaysia?

Powering the national grid, these projects could significantly boost clean power by up to 2500MW 3. Future RE programmes are set to accelerate the development of solar projects in Malaysia, aligning with the country's energy transition goals.

Can solar power meet Malaysia's daytime demand?

Technically, solar power can reliably meet Malaysia's daytime demand, while the non-solar hours demand could be addressed by utilising hydropower and building more storage facilities over time. Despite the high cost, investing in energy storage solutions such as battery energy storage systems (BESS) is critical.

Lilongwe - June 2024 - As the sun sets in most villages in Malawi, the dawn of darkness is also the dawn of anxiety for women, men, children, and particularly school-going children. Only 23% of Malawi's population has access to electricity. Many households must rely on battery-powered torches, candles, and kerosene lamps for lighting inside the house.
