Why is Vistra deploying energy storage in Moss Landing?

The energy storage facility that Vistra is deploying in Moss Landing will help us build a more reliable, low-emission grid, providing zero-emission power to communities far and wide when they need it.

Does Vistra have a battery storage facility?

Vistra recently completed construction on Phase II of its Moss Landing Energy Storage Facility. The battery system is now storing power and releasing it to California's grid when needed. The 100-megawatt expansion brings the facility's total capacity to 400 megawatts/1,600 megawatt-hours.

When will Vistra's Moss Landing battery energy storage project start?

Pending the receipt of CPUC approval, Vistra anticipates construction on the third phase of the Moss Landing battery energy storage project will commence in May 2022 and will begin commercial operations prior to June 2023. With a robust pipeline of projects, Vistra plans to grow its zero-carbon Vistra Zero portfolio to 7,300 MW by 2026.

Does Vistra own wind power?

In addition, Vistra is a large purchaser of wind power. The company owns and operates the 400-MW/1,600-MWh battery energy storage system in Moss Landing, California, the largest of its kind in the world.

Could Moss Landing energy storage facility support intermittent renewables?

California leads the country in the transition away from fossil fuels and the Moss Landing Energy Storage Facility stands as a model for how batteries can support intermittent renewables to help create a reliable grid of the future.

Does Vistra own a nuclear power plant?

Once the transaction closes, which is expected later this year, Vistra will own and operate the second-largest competitive nuclear fleet in the country, with 6,400 MW of carbon-free nuclear power.
