

Could bio-methane be a key factor in Malta's future power sector?

Hydrogen technology and bio-methane could also play an important part in Malta's future power sector depending on international developments of these two clean fuels.

What is Ewa's vision for Malta's power sector?

EWA's vision for Malta's power sector foresees sustained growth of generation from renewable sources, powered by indigenous onshore solar PV installations, large-scale offshore renewable technologies, such as floating wind and solar, and green energy imported over interconnections with neighbouring countries.

Can Malta import hydrogen from Italy?

Malta is also actively studying the possibility of importing hydrogen from Italy through the Melita TransGas Pipeline project, which will not only end Malta's isolation from the trans-European gas network but will also provide an opportunity to import renewable gases, such as green hydrogen or biomethane, once the market develops.
