

Mauritania lead lined storage container

Who manufactures lead lined storage containers?

Nuclear Lead Co. Inc. manufactures all types of lead lined storage containers. They can be custom designed and adapted to meet various industry needs. Nuclear Lead Co. Inc. offers a comprehensive line of lead lined storage containers for functional and radiation-preventing purposes.

What is a lead lined container?

Lead lined containers to store radiopharmaceuticals or other radioactive materials. We manufacture these containers based on your specifications to fit the equipment or materials you need to store or transport. These lead lined containers can be finished in multiple ways tailored to your needs:

What are lead storage containers used for?

Lead storage containers from Nuclear Lead Co. Inc are used for various applications. They are used by some customers to store and transport radioactive materials. Others require them for vial pigs for high-energy radionuclides, including PET, or unit dose pigs for radiopharmaceuticals. Yet others need them for nuclear densitometer storage.

Can you store radiopharmaceuticals in lead lined storage containers?

Lead lined storage containers to safely store radiopharmaceuticals or other radioactive materials. Send us your drawings or specifications to receive a quotation.

Can a lead lined container be finished?

These lead lined containers can be finished in multiple ways tailored to your needs: If the outside of the lead container is left unfinished, we will always paint the lead to prevent any exposure to the raw lead.

units of radioactive material, and featuring 30 mm lead shielding the Multi-use Container is well suited for higher energy isotopes such as FDG, Zr-89 or I-131. Example Specifications Materials Stainless Steel Maximum Mass 30 kg Maximum Lead Thickness 24 mm Vial Storage Pots A variable thickness of lead can be installed in both the

Maximum Lead Thickness 24 mm. Counter Storage Box. An encased lead storage box with fully welded seams, this product is fully watertight preventing any leaking contents from seeping into the structure. Features a lockable lid and handle. Example Specifications. Finish / Materials Powder Coated / Stainless Steel Maximum Mass 29.7 kg

Whether for medical facilities, research laboratories, industrial settings, or nuclear power plants, our lead-lined storage containers are designed to guarantee the utmost safety and efficiency in handling radioactive materials. Applications of Lead Storage Containers. Lead storage containers have diverse applications in nuclear facilities ...

Mauritania lead lined storage container

The interior of the container is constructed of .063" aluminum and .25" lead. The shielding combination attenuates gamma radiation, beta radiation and errant bremsstrahlung. Extra protection is provided with a specially designed hatch door that protects the user from container contents even while open.

Lead Transport Containers. Nuclear Lead Co. Inc. designs and manufactures lead shipping containers to safely and efficiently transport radioactive materials. One of the most popular uses of these containers is designed for shipping of syringes with F-18 radiopharmaceuticals.

Nuclear Shields produces shielded storage solutions for many different requirements. Our current standard product range consists of shielded storage cabinets, shielded pet safes, mobile shielded containers, lead bricks, tabletop l-block shields and more shielded storage solutions.

The Lead Lined Waste Container has a rugged steel construction and a positive leverage foot pedal with hinged lid for "hands free" operation. 1-888-9SIRONA info@sironacc L-Block Shielding & Storage; Lead Bricks & Mobile Barriers; Dosimetry & Calibration Services; Wipe Test & Well Counters; Lead-Lined Laboratory Furniture; Software;

Workspace - Lead lined cabinets can provide additional workspace for professionals to complete necessary tasks.; Lab Space - Adding lead lined cabinets to your hot lab allows the space to be used more efficiently, which can improve workflow.; Additional Tools - Additional tools can be integrated into the cabinets to improve efficacy, including dose calibrators and generators.

NELCO has a long history of manufacturing custom lead-lined storage containers to your specification for storing radioactive materials. Whether you're an OEM, Medical Facility, Laboratory or nuclear facility NELCO has the necessary team of engineers and physicists to design and manufacture the appropriate storage container to fit your application.

Since our start in 1932 NELCO has serviced the needs of the Bromine lead lined storage and shipping container market. With our extensive metal fabrication and lead lining capabilities along with our staff of engineers we can build to your specification a storage container or shipping vessel to meet your requirements.

Shielded Storage Containers are useful for storing used syringes, alcohol wipes, etc., that may be contaminated with low-energy gamma or beta radiation residue prior to disposal. The 050-200 and 050-250 Storage Containers are constructed of stainless steel lined with .125" lead (.32 cm.).

Lead lined containers to store radiopharmaceuticals or other radioactive materials. Nuclear Shield manufacture these containers based on your specifications to fit the equipment or materials you need to store or transport. These lead lined containers can be finished in multiple ways tailored to your needs: - painted steel - stainless steel

Mauritania lead lined storage container

<p> Lead lined laboratory cabinet to store radioactive materials. This shielded hotlab cabinet belongs to a modular range of shielded hotlab furniture and is available with 6, 12.5 and 25 mm lead shielding. Due to it"s modular design, it ...

This storage system is excellent for storing vials of isotopes, contaminated instruments and tools, radioactive samples, solutions, or waste. 0.76mm (0.030") thick lead shield encased in 6.4mm (¼") thick high-density polyethylene helps ...

<p> shielding thickness: 60 mm lead
 lead time: 6-8 weeks

 Lead shielded containers with 60 mm of lead shielding and a stainless steel finishing for easy cleaning and decontamination. The container can be locked using two padlocks. The lid can be secured to the container by screwing the two lifting eyes into position. A seal between the lid and the ...

MarShield specializes in the production of standard and custom-designed lead-lined storage containers and waste containers tailored for the nuclear medicine industry. These containers ...

Plastic shelled lead storage containers for radioactive material, known in the industry as "Pigs", The internal container is a solid cast lead container fabricated for nuclear material containment. Safely store your uranium ore, radioactive ...

Nuclear Shields manufactures lead-lined storage cabinets and lead-lined containers for radioactive sources. These cabinets can be used for various applications and can be custom made to your dimensions, amount of drawers ...

The Lead Lined Storage Container can be used to store radioactive materials that require lead shielding of 1/8" (0.3 cm) or less. The container is made of steel and has 1/8" (0.3 cm) thick lead on all sides, top and bottom.

MarShield manufactures a comprehensive line of custom designed Lead-Lined Storage Containers designed to your exact requirements. MarShield has worked seamlessly with end users including hospitals, laboratories, medical facilities, and Nuclear plants ensuring that a final design is functional and fits within its surroundings and radiation code requirements.
