

Mauritius the holcomb energy system

Holcomb Energy Systems is dedicated to the research and development of a better future. Our mission is to develop technologies to support a high quality of life for everyone on a healthy ...

The Holcomb Energy System. The HES is a labor of love, born out of a desire to contribute to the greatest cause of our time. After 13 years of extensive research and product development, we are proud and ready to ...

With decades of experience across the medical, scientific, and energy industries, Dr. Holcomb is a pioneer in modern invention with hundreds of patents across a range of industries, from ...

The Holcomb Energy System requires no grid infrastructure. It can operate anywhere, even in the middle of the Sahara, providing 100% zero carbon footprint power to any size load, using no fuel. And because it operates with no moving parts, there's no heat and no wear and tear, so it requires very little maintenance.

The Holcomb Energy System (HES) is a transformational technology that can help to address some of the world's most critical energy issues, such as rampant carbon emissions, rising global demand for energy, inequities to access, soaring energy costs, a bottleneck supply of the world's energy resources, our continued reliance on fossil fuels ...

For over 15 years, Holcomb Energy Systems has been researching and developing a solid-state, self-sustaining power generation system with applications everywhere electricity is needed. Here's a video from the HES 2018 archive taken during a power blackout.

Genau solche dezentralen Lösungen werden mit der Holcomb-Technologie möglich. Wie uns Ellen Holcomb am 13. Juni geschrieben hat, gibt es unzählige Anwendungen für das Holcomb Energy System HES, von der Unterhaltungselektronik über das Transportwesen bis hin zu Haushalten und Unternehmen und natürlich dem Stromnetz.

Dr. Holcomb has also patented numerous environmentally friendly products, processes, and devices, including a CO2 converter that captures CO2 in power plant emissions and in the atmosphere and ...

Our core technology, the Holcomb Energy System (HES), is an entirely new source of energy -- using no fuel and putting out zero emissions, it is scalable, silent, and point of use. It is applicable everywhere that electric power is ...

The Holcomb Energy System makes tailpipes and plug-ins obsolete. Powered by our solid-state system, cars, trucks, buses, trains, or any other type of transportation will never require a refill or a recharge. And when that vehicle is parked, it becomes a power plant, providing clean, point of use power to the home, office, or the

grid.
