Vaisala reinforces market leadership position with new WindCube service enhancements New service enhancements include extended warranty period and complimentary online training to increase customer value and support Strengthening its commitment to innovation and customer-centric solutions in the wind energy sector, Vaisala today announced service enhancements to ...

Mayotte is no doubt the French overseas territory facing the most challenging energy transition. It has the highest cost of electric power generation, at nearly EUR350/MWh in 2021, and the most carbon-intensive production, with fossil fuels ...

The world is all working towards making clean energy the primary, or even the only, energy source available. In China, for example, the world's first all-clean energy ultra high-voltage (UHV) power transmission project was built in Qinghai Province at the end of 2020, delivering clean power to areas up to 1563 km away. The reasons to choose ...
