How much does electricity cost in Montserrat?

Montserrat's utility rates start at \$0.53 per kilowatt-hour(kWh) for residential customers, which is above the Caribbean regional average of \$0.33/kWh. Like many island nations, Montserrat is almost entirely dependent on imported fossil fuels, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

How much power does Montserrat need?

On a normal day, Montserrat needs 2 megawatts of power. He acknowledged that there is some confusion as to why with 1 megawatts of solar power, a fairly new generator system, a generator purchased in 2016 and the original gen sets the island still had frequent outages. The minister said there are five generators and two are down for major repairs.

What will mcwel do for Montserrat's power situation in 2022?

MCWEL has also drafted a geothermal resource act which is to be submitted to cabinet shortly. This act will provide the legislation for licensing and taking the geothermal resource to market. The minister wants to make a definitive decision on Montserrat's power situation in 2022.
