Led by GE Energy Consulting and supported by GE Myanmar, the seminars were held in Nay Pyi Taw from 4 to 6 June and in Yangon from 9 to 11 June with a focus on Power Systems Engineering and Distribution Systems Planning and Analysis. Training participants learned of industry best practices for power systems that may be implemented in Myanmar.

Myanmar has one of the lowest electrification rates in the world, and most of its inhabitants, who lack access to electricity, live off-grid in rural areas. Despite Myanmar having abundant sun and wind energy resources, which could potentially generate electricity for rural communities, renewable energy growth in Myanmar is stunted. In this article, we examine the ...
