

Who is Myanmar Solar power trading?

Myanmar Solar Power Trading Co.,Ltd is established in 2011 and we are one of the leading full-service providers for C & I projects, residential, industrial and large scale solar projects in Myanmar. From a single point of contact, we provide solar PV designs, calculations, consultations, installations and repair and maintenance services as well.

How much solar power does Myanmar produce?

"Average annual total of solar power production in Myanmar varies between 1,150 kWh/kWp (kilowatt-peak) and 1,600 kWh/kWp, with high values in the central region. In the mountains, power production is lower: up to 20% or more due to terrain shading," according to their Myanmar research report.

Is solar energy gaining traction in Myanmar?

Solar energy is just beginning to gain some traction in Myanmar, a country that has been gradually opening up its economy and society to the world since 2011.

Is Myanmar a good country for generating electricity?

Renewable energy, in the form of large-scale hydroelectric power, already accounts for around 60%, the single largest share, of Myanmar's electricity generation mix. The country also has an abundance of natural gas, an important export and the source of hard, foreign currency export revenues, as well as domestic power generation.

What are Myanmar's energy goals?

Myanmar's government has set modest goals of renewable energy resources generating 8% of national output by 2021 and 12% by 2025, as well as universal electrification by 2030. In addition, a total of 68 townships and 5,191 villages had received 24x7 access to electricity services between 2016 and 2019, according to state media. Figure 9.

What is ADB doing in Myanmar?

With funding from the Japan Fund for Poverty Reduction, ADB, working with Myanmar's Ministry of Agriculture, Livestock, and Irrigation (MOALI) as the executing agency, the Department of Rural Development (DRD) and regional and local government agencies, installed demonstration solar mini-grid systems in 12 rural villages in the country's Dry Zone.

"Myanmar has incredible potential for solar energy: the International Growth Centre has estimated Myanmar's solar potential to be 51.973 TWh (terawatt-hours) annually," according to FinerGreen and ABO Wind, the authors of the ...
