

Will Namibia become a supplier of energy?

Once Namibia has successfully incubated the green hydrogen economy, it will enable the country to become a supplier of energy, rather than an importer.

Who is cleanenergy solutions Namibia?

This collaboration between two solid family-owned companies stems from a shared vision to deliver a remarkable and impactful project in Namibia. Cleanergy Solutions Namibia is leading the development of a green hydrogen production plant in Namibia's Erongo region.

Can Namibia become a green hydrogen production hub?

Namibia is on the cusp of becoming a green hydrogen production hub, thanks to its abundant renewable energy resources. Cleanergy Solutions Namibia, a powerful partnership between the Ohlthaver & List Group (O&L) and CMB.TECH, is leading the charge in driving this transformation.

How will solar power benefit Namibia?

The generation of solar power will complement Namibia's available green energy portfolio, such as hydro-electricity, which already constitutes more than two-thirds of our installed power capacity. Electrifying key parts of our economy and of our neighbours will spur unprecedented economic activity and growth for Namibia and Southern Africa.

Will Namibia reach net-zero emissions in Africa?

Outlined in the Harambee Prosperity Plan II, Namibia aims to become the first country to reach net-zero emissions in Africa. Since 2021, Ohlthaver & List (O&L) and CMB.TECH have been working together to leverage their unique expertise. Both companies have a history of more than 100 years of being entrepreneurial and innovative.

Does Namibia need a power trading system?

The required infrastructure for power trading already exists. About 40% of Namibia's power currently comes from South Africa and is primarily driven by coal-fired power plants. We imagine a reality where Namibia exports clean energy to South Africa thereby assisting the Southern African region to decarbonize.

O&L Executive Chairman, Sven Thieme and O&L Chief Experience Officer, Franziska Rueeck with the Cleanergy team. About Cleanergy Solutions Cleanergy Solutions is a leading innovator in green energy, ...

Leveraging the O&L Group's expertise in renewable energy, combined with CMB.TECH's proficiency in producing and applying future fuels, Cleanergy Solutions Namibia is at the forefront of sustainable energy solutions.

Projection scenarios. A 2019 report identifies that by 2030 still 36% of Namibians will still not have access to modern energy under the Business-as-Usual (BaU) (= &quot;New Policies&quot; Scenario of the International Energy Agency's World Energy Outlook 2018), while 32% will have access to the grid, 11% to a mini-grid and 22% to a SHS. The investment needs in a BaU scenario are higher ...

Namibia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Globally, sustainability has spurred a wave of green innovations, from renewable energy solutions to eco-friendly consumer products. Namibia, with its untapped potential in sectors such as green hydrogen and renewable energy, stands to benefit significantly from these trends. ...
