

Does Nauru have an energy road map?

Currently Nauru is working on an Energy Road Map, including action plans for the development of renewable energy and energy efficiency sufficient to significantly lower imports of diesel fuel for electricity generation.

What type of energy is used in Nauru?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Nauru: How much of the country's energy comes from nuclear power?

Who is Energon?

ENERGON -- We develop and supply energy storage and power generation solutions since 1998. More than 20 years of development history allows us to provide an individual approach in solving a wide range of tasks in the energy sector. Industrial rechargeable batteries, solar modules & solutions on their basis are in our focus.

How can we monitor progress towards Nauru's energy sector goals?

In order to monitor progress toward Nauru's energy sector goals and to plan for future energy projects, it is essential that accurate, timely, (reasonably) complete, consistent, up-to-date and accessible database collected, stored and maintained regarding renewable energy resources, energy imports and energy use in Nauru.

Why is Nauru so vulnerable to solar energy?

Solar energy is the only proven renewable energy resource which could be utilised in short to medium term to reduce dependency on fuel imports for electricity generation. The country's vulnerability is also increased by its isolation from other Pacific Islands. In 2012, SPC released an energy profile of Nauru based on 36 energy security indicators.

What is Nauru Utilities Corporation?

Nauru Utilities Corporation is a Utility Supplier that provides Electricity and Water to the people of Nauru.

In order to achieve Nauru's ambitious goal of reducing the country's high reliance on imported fossil fuel by meeting 50% of its energy needs from renewable energy sources by 2015,¹ the Nauru Government requested technical support from GIZ, SPC and IRENA in the development of a Nauru Energy Road Map in early 2012. The aim

Nauru's grid electricity supply comes from a single power station operated by NUC. The generation, transmission and distribution equipment is old, with much of it urgently needing repair or outright replacement. ... The Japanese utilities company TEPCO undertook a technical trial of OTEC in 1981 with an
