Battery energy storage systems: the technology of tomorrow. The market for battery energy storage systems (BESS) is rapidly expanding, and it is estimated to grow to \$14.8bn by 2027. In 2023, the total installed capacity of BES stood at 45.4GW and is set to increase to 372.4GW in 2030.

X-Pact Battery Storage is the advanced, reliable, modular and scalable containerized BESS solution for any energy management strategy in any environment. BESS technology enhances performance at every stage of the power transmission chain. It is an important pillar of green steel technology, as green steel production requires an entirely new energy infrastructure.

Battery Energy Storage Systems (BESS) have been developed to store electrical energy and make it available on demand. BESS can be used in a variety of applications, including grid energy storage, used to balance supply and demand, integrating renewable energy sources, and providing backup power during outages.
