

Niger right power solutions

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.

What is man energy solutions doing in Niger?

MAN Energy Solutions is also involved in the expansion of a power plant near Niger's national capital, Niamey. With 4 MAN 18V48/60TS engines already in operation on-site, the addition of another engine of the same type will add another 20 MW to the power plant's total capacity, bringing it to a total of more than 100 MW.

What if Niger doesn't have electricity?

Only one in seven Nigeriens have access to modern electricity services, and just four percent of rural residents have access through the national utility. Without power, there is no viable path for economic growth and development, and few prospects for people living below the poverty line. But Niger has a plan.

Is Niger's electricity supply sufficient to meet the growing demand?

In Niger, the majority of population today does not have access to electricity. This study analyzes how the electricity consumption could increase, and whether Niger's supply plans are sufficient to meet the growing demand. With the current efforts of electrification, Niger will have supply capacity of 1,361 GWh by 2020 and 1,444 GWh by 2024.

Is there a deficit in electricity supply in Niger?

CONCLUSIONS The study showed that there is a big deficit in electricity supply to the people in Niger. With its growing population and expected economic growth the demand will increase in near future further.
