

Niue solar on installments

Will Niue build a solar farm?

Niue is seeking about US\$18 million to build a solar farm as part of the island nation's plans to reduce its heavy reliance on fossil fuels. The minister for infrastructure, Dalton Tagelagi says Niue's strategic energy road map sets the ambitious goal of having 80 percent of its power generation coming from renewable energy sources by 2025.

Where is Niue located?

Niue, the largest unraised coral atoll in the world, is situated in the South Pacific Ocean, some 2,400 kilometres northeast of New Zealand. Like many island nations, Niue is heavily dependent on diesel fuel for power generation.

What is Niue's energy roadmap?

Under the new energy roadmap, Niue has set a goal of 80% renewables by 2025. According to Radio New Zealand, while the main focus of Niue's energy transition will be on solar power; the potential of other renewables such as wind power, biomass and wave energy will be investigated.

How much of Niue's diesel fuel is used for power generation?

Approximately 69% of diesel fuel imported into Niue is used for power generation - around 800,000 litres. Under the new energy roadmap, Niue has set a goal of 80% renewables by 2025.

When will Niue's New Power Station be online?

On the 18th September 2024, Niue's new power station was brought online. This represents the culmination of years of work from Niue Power Corporation (NPC) staff, local and overseas contractors, and our development partners.

Meezan Bank helps you get solar panels for your home. With Meezan Solar, you can pay the whole system in installments without extra interest. This means you can save up to half your monthly electricity bill. This helps the environment too. You can get a solar system from 1 kilowatt to 1000 kilowatts. The financing starts from Rs. 100,000 and goes up to Rs. 2,500,000.

Similarly, Niue's largest solar array (near the hospital) requires some inverters to be replaced. These are on-island, and replacement work will be carried out in the next few weeks. At this point, we will be able to bring a sizeable portion of solar back on the grid and reduce diesel consumption from running the generators full time.
