

The company develops and produces tailor-made battery solutions to enable the green shift in Norwegian industry. Through the investment the company gets necessary funding to develop ...

The battery systems include software for control and operation of the containers with intelligent planning for optimized energy use at all levels. o With its Industry 4.0 initiative, Nordic Batteries will supply tailor-made battery solutions developed for the green transition of the future.

The transport sector represents 25 % of Europe's CO2 emissions and sustainable mobility is one of the key focuses of the European Green deal. We invite you to the coming webinar looking into the status of the battery ecosystem in Norway and Sweden. Official hosts of the webinar are Innovation Norway, Eyde Cluster, Confederation of [...]

The Nordic Vision. The Nordic region aims to be home to Europe's leading sustainable, competitive, and innovative battery ecosystem by 2026. The Nordic region boasts strong momentum for growth with key actors in all parts of the battery value chain and a high engagement in European R& D and networks.

Nordic Batteries fills the gap in the value chain between cell producers and system integrators, completing the Norwegian value chain for battery production. They have developed battery modules and ground-breaking technology for automated assembly.

The battery is the heart of any solution that requires secure power. It ensures the storage of energy and the ability to deliver energy as needed. Anda-Olsen customizes battery packs for demanding and critical applications in a range of sectors, including shipping, the offshore industry, healthcare, power producers, land-based industry ...

Nordic Battery Thursdays is a collaborative webinar series that provides in-depth insights on the potential, opportunities and impact of the battery sector within the Nordics. The purpose is to promote the Nordic drive

for a sustainable battery value chain towards both the Nordic region and international markets.

This webinar is a part of the Nordic Battery Collaboration which is funded under the Sustainable Minerals program. The aim of this project is to organize a series of webinars looking into topics such as recycling, critical minerals and mining, big data and traceability and battery strategies. Read more about the Nordic Battery Collaboration

I Nordic Battery Belt Logistics tas fram en strategi som ska bidra till hållbara och kostnadseffektiva transporter i regionen i ett gränsöverskridande perspektiv. Strategin ska ge en ökad förstelse för vilka nya logistikflöden som kan förväntas uppstå till följd av pågående och planerade etableringar av batteriproduktion i regionen.

The importance of regional team for a battery industry location. Ejike Okonkwo's article explains why the agency of regional actors is crucial for optimizing access to the location site of the Nordic battery industry doing so, the article enhances the understanding of the role of regional agency in the vast network of investments and their playground.

They show that the Nordic Battery Belt (NBB) is an emerging cross-border regional network established to proactively identify the prevailing and the envisaged connectivity challenges within the ...

Bryne-based Eldrift offers infrastructure solutions with these jointly developed battery packs to various mobile and stationary battery energy storage solutions. Morrow, the industrial technology company speeding up the energy transition, recently announced that it expects to produce the first next-generation LNMO-X batteries at its Customer ...

Nordic Batteries announces a strategic partnership with Morrow and Eldrift to develop complete battery packs for mobile and stationary battery energy storage solutions (BESS). The overall project and product pipeline amounts to 7 GWh ...
