By utilizing and recycling the wasted energy from buildings, users can save lots of money and protect the environment. iHandal's 3C process : CAPTURE + COMPRESS + CHANNEL are cost-saving heating and cooling solutions that have proven to save energy consumption.

What happened to North Korea's energy system?

North Korea relied heavily on the Soviet Union for subsidized oil, and the country's energy production and consumption rates dipped following the Soviet Union's dissolution. The absence of these energy subsidies, aging infrastructure and a poor national grid system caused North Korea's energy sector and economy to fall behind.

How can North Korea improve access to energy in rural communities?

As North Korea continues to invest in renewable energy sources, increasing access to energy in rural communities should be of special concern. The majority of North Korea's population lives in rural areas, which are regions with scarce access to electricity and other energy supplies.

How is North Korea's energy crisis affecting its citizens?

North Korea's chronic energy crisis is threatening the quality of life of its citizens, especially those living in rural areas, by restricting the quality of and access to essential energy-powered resources.
