Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

How to increase energy storage and system flexibility in Macedonia?

Furthermore, in order to increase the energy storage and system flexibility, among top priorities is the construction of pumped-storage hydro power plant Chebren. The objective is up to 2028 this power plant to be commissioned. The natural gas market in Macedonia is liberalized starting from 2015.

How much energy does North Macedonia need to make 1 EUR?

In fact, North Macedonia needs to spend 0.24 toe (2.8 MWh) of energy to make 1 EUR, unlike EU28 where only 0.1 toe (1.2 MWh) is needed. Proposed measures, especially in the area of energy efficiency, will increase the productivity without increasing energy consumption, bringing North Macedonia closer to the EU 28 average. Figure 11.

Does North Macedonia need a coal phase-out?

Even though the country has historically been dependent on lignite coal mining for around 30% and gas imports for an additional 15% of its electricity production, it has nonetheless set very ambitious goals for decarbonization. As part of the Powering Past Coal Alliance, North Macedonia has committed to a coal phase-out by 2027.

Will Macedonia have 250 MW PV roof-top systems?

The Macedonian objective is to have 250 MW PV roof-top systems- either prosumers or systems from which the overall produced electricity will be used for own purposes or will be stored.

[1] At the time the partnership was initiated, the House Democracy Partnership was known as the House Democracy Assistance Commission (HDAC). The name was subsequently changed to reflect the nature of HDP as a partnership with partner countries.
