

Is seplos a good BMS?

I must add, for those looking for a BMS, I'm quite happy with the Seplos (10E). Yes It's balancing ability is non-existent and the software can be confusing, but it seems pretty solid.

How do I connect a seplos BMS to solarassistant?

Once you press connect in SolarAssistant, you should see each pack show up under the battery section. If you make any cabling or dip switch changes, ensure you press disconnect and connect in SolarAssistant to rescan available packs. How to connect a Seplos BMS to SolarAssistant.

What is a BMS & how does it work?

The BMS is simply passing information to the control device. The Inverter charger settings must be set INSIDE the limits of the BMS. Example: If the BMS Low Voltage Cut Out is set to 46V then the Inverter should be set to stop drawing power from the battery at 47V to 48V. Likewise for all the other settings.

How many volts can a semplos BMS charge?

Look like I'm on the same journey as you,I have the Semplos BMS which came with my vertical unit and 16 EVE 280 Cells. Did you manage to setup your BMS parameters,I thought your settings in your sheet seemed a bit high. I was only charging to 3.5v per cell which gives a 56voltmax and a safety cut off of 3.65v 58.4v.

Can bmsstudio be used in parallel mode?

Fixed it! Bottom right of the BMSstudio screen is "In standalone mode" by default, click it and you get a pop-up "To parallel mode", click that and it all works.

über CAN-Bus. Das BMS mit den vielen Einstellungen habe ich mittlerweile auch ziemlich gut verstanden und macht das was ich möchte.

The Seplos BMS can be configured when to do the balancing. The active balancers usually are not "smart" and support no configuration. You need to find an active balancer that will balance only under appropriate conditions. I.e. activate the balancing only under specific conditions. Let's say over 3.45V.

Ich spiele mich gerade damit, das Seplos V16/10E BMS mit einem FSP PowerManager 10k und einem MPP Solar 15KW Hybrid zu verbinden.
