

Northern Mariana Islands solaroid energy

Which sectors use the most electricity in the Northern Mariana Islands?

The commercial sector, led by tourism, is the largest electricity-consuming sector in the Northern Mariana Islands. 53 CNMI hotels use electricity for air conditioning, water heating, water purification, and lighting.

Does CNMI have a solar power plant on Saipan?

A large 20-megawatt solar photovoltaic (PV) facility on Saipan is in the preliminary stages of development. CNMI's electric utility generates electricity at five diesel-fueled power plants (three on Saipan and one each on Tinian and Rota) and the territory's entire population has access to electricity.

Are solar farms coming to Saipan?

The CNMI Office of Planning and Development has received proposals for several large solar energy projects in recent years. Currently, three sites for solar farms on the islands have been identified. A large 20-megawatt solar photovoltaic (PV) facility on Saipan is in the preliminary stages of development.

Does CNMI have electricity?

CNMI's electric utility generates electricity at five diesel-fueled power plants (three on Saipan and one each on Tinian and Rota) and the territory's entire population has access to electricity. In 2021, electricity prices in CNMI were 6% less than in 2019, but they were 2.5 times the U.S. average.

Why are some islands reliant on fossil fuels?

Like many islands around the globe, the featured islands are heavily reliant on fossil fuels for electricity generation, leaving them vulnerable to global oil price fluctuations that directly impact the cost of electricity.
