In conclusion, Renz warns against basing future assessments of Russian military power solely on its performance in 2022. In the third contribution, Per Ekman unpacks the mechanisms that underpinned Ukraine's shift to a firm pro-Western foreign policy in 2014, which occurred after two decades of balancing between Russia and the West ...

Russia's future will be characterized by a smaller population. Russian President Vladimir Putin's war has virtually guaranteed that for generations to come, Russia's population will be not only smaller, but also older, more fragile, and less well-educated. It will almost certainly be ethnically less Russian and more religiously diverse.
