Short title and commencement.\_\_(1) This Act may be called the Pakistan Atomic Energy Commission (Amendment) Act, 2010.

Pakistan: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Besides disincentivising renewable energy, Pakistan has also placed on-grid procurement under the control of the IGCEP. Both disincentivisation and entry control by IGCEP make the sector less attractive for potential investment in renewables. Pakistan's unresolved commercial issues also seem to be act as barrier to the successful harnessing ...
