the project for techno-commercial evaluation of ESS projects will help the stakeholders choose the optimum levels of ESS for different applications. The guidelines for assessing the hosting capacity of VRE on the distribution grid will help utilities to plan their grid upgrade requirements to match with the expected penetration of VRE.

This represents a significant reduction in the price gap. Despite the incomplete statistics on our winning projects in March, we maintain that the margin profits for ESS integrators are constrained, as evidenced by the bidding prices from other periods. The price disparity between ESS and batteries has continued to shrink Unit: RMB/Wh
