

Does Panama have solar power?

Since 2014, investments in solar and wind energy have grown markedly. Today, more than two-thirds of Panama's electricity generation comes from clean sources, primarily through the contribution of hydropower. The country also has the largest wind farm in the region, and solar power generation - although still modest - has begun to take off rapidly.

Are solar auctions legal in Panama?

Law 44 of 2011 created wind-specific auctions, as well as accelerated depreciation on wind equipment and tax exemption for up to 15 years for wind equipment producers based in Panama. Law 37 of 2013 established solar-specific auctions in Panama, along with accelerated depreciation on solar energy equipment (ASEP, 2017).

What challenges do solar and wind companies face in Panama?

Despite abundant renewable energy resources, solar and wind companies in Panama face economic challenges, given that the current power market model is based on conventional sources such as thermal and hydropower generation and does not recognise the unique operating characteristics of variable renewable energy (VRE) generation.

Are floating solar panels a Panama Canal Green Project?

Panama Today (2017), "Floating solar panels: a Panama Canal green project", 25 November 2017, www.panamatoday.com/panama/floating-solar-panels-panama-canal-green-project-5836 (accessed 12 December 2017).

Are power system operations in Panama still a 'old paradigm'?

Challenge: Power system operations in Panama still reflect the "old paradigm" of centralised, dispatchable generation units. Given the unique physical conditions of VRE sources, challenges emerge for system operation with high shares of variable renewables.

Does Panama offer tax incentives for wind & solar energy?

More recently, Panama established tax incentives for wind and solar energy. Law 44 of 2011 created wind-specific auctions, as well as accelerated depreciation on wind equipment and tax exemption for up to 15 years for wind equipment producers based in Panama.
