Many want solar options that are easy to install and affordable. Luckily, such options exist. These include portable solar panels, solar panel kits and off-grid panels. Off-grid solar panels can harness enough power to supply energy for your entire home, while portable solar panels are better for on-the-go solar power usage.

Most solar panels installed today are about 400 watts in size and have efficiency ratings above 19%. Higher wattage and efficiency panels can produce slightly more electricity but may add a price premium. You'll want to make sure the solar panels have the industry standard 25-year product and performance warranties.
