

# Paraguay power system inc

Does Paraguay have electricity?

Paraguay is one of the few countries in Latin America that has maintained an integrated electrical system. Because of the dominance of hydroelectricity, tariffs (mostly residential) are remarkably below the averages for the region.

Does Paraguay have hydro power?

[espa&#241;ol]o [portugu&#234;s]This page is part of Global Energy Monitor 's Latin America Energy Portal. In 2020,hydro power provided 100%of Paraguay's electricity and roughly half of the country's overall energy supply,with biofuels and imported oil accounting for the remainder.

Does Paraguay use natural gas?

Paraguay has no proven natural gas reserves,and it neither produces nor consumes natural gas. In recent years,the country has sought to promote the consumption of natural gas as a way to decrease the use of firewood and charcoal,which has contributed to deforestation in the country.

Does Paraguay produce coal?

Paraguay produces no coal. Paraguayans consumed 1,680 short tons of imported coal in 2016,approximately 248 cubic feet per capita annually. However,Paraguay has been phasing out imports as it moves towards a fully renewable energy matrix,and consumption has dropped to virtually zero since 2016.
