This 600 watts solar and wind hybrid generator (400W wind + 200W solar) will produce more than 80 Kwh of energy per month. It is enough to power the basic appliances and electronic equipment of a small house such as refrigerator, TV, laptop, etc. ... Why Choose Wind Turbine and Solar Panel Combination.

You would need the inverter PLUS when you get solar panels, you would have to invest in a solar charge controller (or possibly several) to provide the ability to recharge from solar. On the plus side, if your charge controller goes down, you can still use every other aspect of the system till you replace it (and it doesn't matter what SCC you ...

This unit and expandable ecosystem for backup, smart energy management and lower energy bills is expandable to 4kW-8kW-12kW, with a total expansion up to 48 kwh ...

100kWh would be the generator size for peak output. It would be about 500kWh per day in consumption total. I guess system size aside, what would be the best way to construct a solar panel system with battery backup to power the whole house and having a generator available to recharge the batteries to supplement solar generation?

Highlights.
