What is plug load solutions?

Plug Load Solutions was an energy-efficient technology products program run by Ecova. It was rebranded from the existing "80 PLUS" program, requiring a new website and supporting marketing materials. The program was an expansion of offerings to data centers, computers, monitors, televisions and smart strips.

What is a plugload advanced power strip?

The Plugload Advanced PowerStrip (APS) looks like a normal power strip but has features designed to reduce the amount of energy used by many consumer electronics. The APS operates on the basic principle of shutting off the power supply to devices that are not in use.

How does a plugload APS work?

The APS operates on the basic principle of shutting off the power supply to devices that are not in use. By replacing your standard power strip or surge protector with a Plugload APS, you can cut the amount of electricity used by your home office and entertainment center devices and save money on your electric bill.
