

Can Poland achieve an ambitious energy transition?

Poland has the potential to carry out an ambitious energy transition, considering its renewable energy potential, plans for nuclear power, and public support for change.

Does Poland support phasing out coal?

Although the party makes accurate diagnoses regarding the problems of the Polish energy sector (including the issue of aging generation capacity) and declares its support for nuclear energy, it is opposed to phasing out coal and advocates Poland's withdrawal from the most challenging areas of EU energy and climate policy.

Does Poland have a helmsman for the energy transition?

The energy transition in Poland has no helmsman. There is no single centre to manage the process, so the changes taking place are chaotic. Poland has never offered a comprehensive vision for the decarbonisation of the economy or a plan to reduce dependence on energy resources imported from abroad.

Which sector consumes the most natural gas in Poland?

In 2020, natural gas constituted a notable component of Poland's energy mix, representing 6% of energy production and 17% of the Total Energy Supply (TES). The industrial sector emerged as the primary consumer, consuming 49% of the total natural gas.

Will Poland have a power plant in every home?

The group has announced plans to change the regulations to enable a more dynamic development of renewable energy in Poland. One of its election slogans is: "a power plant in every home". Among the major opposition parties, the Confederation has the least favourable programme for accelerating the energy transformation.

Does Poland need energy transformation?

The Polish energy industry, including the management circles of the major energy companies, supports the need for energy transformation. Companies are already planning transition investments, such as the Green Turn programme adopted by Tauron, one of Poland's largest energy players.
