

# Power backup systems in Svalbard and Jan Mayen

What is MOSJ - environmental monitoring of Svalbard & Jan Mayen?

MOSJ (Environmental Monitoring of Svalbard and Jan Mayen) is an environmental monitoring system and part of the Government's environmental monitoring in Norway. An important function is to provide a basis for seeing whether the political targets set for the development of the environment in the North are being attained.

Are Longyearbyen and Svalbard facing an energy transition?

Top image: Longyearbyen and Svalbard are facing an energy transition. This is the background for the cooperation agreement between UNIS, Store Norske and SINTEF. Photo: Graham Gilbert/UNIS. Longyearbyen and Svalbard are facing a huge energy transition.

Will Svalbard get a 6mw/7mwh power system?

The transport, industry and defense-specialised BESS provider will deliver the 6MW/7MWh system to the Longyearbyen community on the island of Svalbard for completion in late 2022. The bulk of Svalbard's population of slightly under 3,000 people live there.

Does ice affect the temperature in Svalbard?

The temperature in Svalbard is strongly affected by ice, which can vary widely from year to year. Hence, the seasons with ice present show greater variation in average temperature from year to year. Trends in seasonal mean temperatures at Svalbard Airport shows a temperature increase for all four seasons.

1 Introduction. The year 2020 marks a milestone in Norwegian polar history: on 9 February it was 100 years since the Treaty concerning the Archipelago of Spitsbergen (hereafter: Svalbard Treaty) was adopted in Paris. 1 The Treaty recognizes Norway sovereignty over the Svalbard archipelago - all islands, islets and reefs between 74° and 81° N and 10° and 35° E.
