

What is Power Resources International doing in Rwanda?

UK company Power Resources International is currently recruiting for technical staff, experts, and managers with the goal of moving forward as quickly as possible on the company's Rwandan project: the opening of a coltan refinery in the industrial zone south of Kigali.

Who founded Power Resources International?

Power Resources International, Inc. (PRI) was founded by Joe Diurno and Victor Ancelson in 1992. They created the company in their basement in Long Island, NY, with a desire to stay close to their families in New York.

How will the Power Resources International refinery benefit Rwanda?

This would be a source of significant income for the country, given that processed minerals sell for a much higher price than raw minerals. The opening of the Power Resources International refinery means that Rwanda will have three different types of mineral processing units in the country comprising coltan, tin and gold.

The energy intensive processes in mining and refining can be difficult to transition to a carbon zero reality, but we are working on it. On average, we plant approximately 20,000 trees per year as an immediate action plan and are striving to move all mining and refining to solar and hydro-power installations by 2026.
