Jordan imports most of its energy and seeks greater energy security as well as lower electricity prices. It had been planning to build a 2000 MWe nuclear power plant for operation by 2025, to provide nearly half its electricity, but is now considering the use of small modular reactors instead. Jordan has significant uranium resources, some in phosphorite ...

The energy intensive processes in mining and refining can be difficult to transition to a carbon zero reality, but we are working on it. On average, we plant approximately 20,000 trees per year as an immediate action plan and are striving to move all mining and refining to solar and hydro-power installations by 2026.

Driven by a desire for sustainability, and motivated by discovery, I'm an experienced... &#183; Experience: Power Resources International Ltd &#183; Location: Kigali City &#183; 500+ connections on LinkedIn. View Ray Power's profile on LinkedIn, a professional community of 1 billion members.
