Any PowerZone (TM) Connect amplifier can be controlled remotely with the Wall-S1 wall-mounted networked / PoE controller. It is simple to install, set-up, configure, and customize for any installed system to manage any sound zone in a location. With PIN code protection for system security and access, you can change source and manage volume in a matter of seconds.

A Turkish firm has cut power supplies to Guinea-Bissau's capital over an unpaid bill of at least \$15m (&#163;12m), plunging the city into darkness. It has severely disrupted daily life, with hospitals...

In theory, all the PowerZone Connect amplifiers can be used. However, for the CBL523, the Connect 252/504 is a good match. To get full power, the bigger versions are recommended. For the CBL528, we recommend the Connect 3004, but lesser models can suffice if full power isn't needed. Using the EQ settings from our website, the speakers are ...
