

Premier solar panel Yemen

What is a solar project in Yemen?

The deal includes the construction of transmission lines and transformer stations. The solar project will be built in Aden. The 120 MW plant will be the "first and the largest strategic project to generate electricity through clean and renewable energy" in Yemen, according to the Yemeni Energy Minister Manea bin Yameen.

Where will a solar plant be built in Yemen?

Masdar, an Abu Dhabi-based renewables developer, is set to build a 120 MW solar plant in Yemen. The developer signed a joint cooperation agreement with Yemen's Ministry of Electricity and Energy earlier this month. The deal includes the construction of transmission lines and transformer stations. The solar project will be built in Aden.

What is the Solar Power Revolution in Yemen?

The solar power revolution in Yemen has clearly saved lives-- it has, for example, powered hospitals and medical clinics. It has also transformed lives.

Why are people moving to solar power in Yemen?

The migration to solar power is part of what researchers say is an energy revolution in the country of 28 million, where the electric grid has been decimated by fighting. More than 50 percent of Yemeni households rely on the sun as their main source of energy, and solar arrays power everything from shops to schools to hospitals.

How much does a solar system cost in Yemen?

Rassam paid about 50 million Yemeni rials (around \$90,000 based on the unofficial market exchange rate) for his system, which is considered large by local standards. The average cost of an array is around \$10,000. Rassam financed the solar panels with a loan from Al Kuraimi Islamic Bank, one of the country's largest private lenders.

Is solar power the main source of energy for Yemeni households?

According to the EADP, which focuses on access to clean and affordable energy, solar power went from being a niche product, used in just a few households in 2012, to the main source of energy for Yemeni households.
