

Price of solar inverter with battery inia Singapore

Can you install a solar inverter in Singapore?

DIY installation of your solar inverter is illegal and is strictly not allowed in Singapore. Instead, connect with our GetSolar experts for a seamless and reliable installation. What's the solar panel installation process like? At GetSolar, we've made the transition to solar a breeze!

Which solar inverters do you use?

Here at GetSolar, we will only use panels and inverters manufactured by Tier 1 manufacturers globally. For residential systems, some of the most popular solar panel brands include Jinko, Trina, JA Solar, and REC. And when it comes to inverters, names like Huawei, SMA, Fimer, and Fronius are quite the favourites.

Do you need an inverter for solar panels?

An inverter for solar panels is essential because solar panels produce direct current (DC) electricity, while your home's appliances and electrical systems run on alternating current (AC). Think of the inverter as a translator, seamlessly converting the DC power from your panels into the AC power that powers your lights and devices.

Do solar panel inverters convert DC to AC?

Solar panel inverters are like the magicians of your solar system, making everything happen behind the scenes. Besides their primary role of converting DC to AC, here's what else they can do: Inverters have built-in systems that keep an eye on your solar panels' performance.

Where do solar inverters go?

Solar inverters are pretty flexible when it comes to where they go, and they're built to handle all kinds of weather. You can set them up both indoors or outdoors. Rest assured, our friendly solar experts will help you find the perfect spot at your home to install a new solar inverter!

What are the different types of solar panel inverters?

You'll find a variety of solar panel inverters on the market, each with its own distinct characteristics: Grid-tied inverters are your everyday heroes. They're the most common choice and are directly connected to your local power grid. You can even sell extra energy back to the grid, cutting down on your energy bills.
