## Why is electricity important in Tajikistan?

Electricity is an integral part of Tajikistan's economy, and providing a clean, affordable and secure supply of electricity has been of paramount importance for the government since independence. Despite its energy potential, Tajikistan's energy sector is susceptible to supply shocks.

## Why is Tajikistan transforming its energy system?

This report backs the transformation of Tajikistan's energy system, which is capable of achieving energy sector development goals that will provide affordable, secure and clean energy for its population and neighbouring markets, while contributing to the region's energy transition and climate change goals. 1.

Which sector consumes the most energy in Tajikistan?

While the industrial sector has historically been the largest energy consumer in Tajikistan, its consumption is now at par with the buildings and transport sectors following significant demand growth in these sectors since 2012.

### How has Tajikistan improved energy demand data collection?

Since then,Tajikistan has improved energy demand data collection with support from the World Bank by developing and piloting three new surveys,including the first household energy consumption survey in 2016 (TajStat,2018),which is to be commended.

## Is there a market for Energy Services in Tajikistan?

At the same time, the EBRD has also opened a credit line for citizens who want to implement energy-efficient technologies in their own homes (EBRD, 2017). A market for energy services and ESCOs does not currently exist in Tajikistan.
