Is RWE a leading investor in renewables in Poland?

Since its entry into the Polish market in 2007, RWE has continuously developed its green portfolio becoming one of the leading investors in renewables in Poland. The company is active in the main renewables technologies in Poland: onshore wind, offshore wind and solar.

How many MW is RWE operating in Poland?

We are currently operating over 45 MW in Poland - an energy source which is essential for a successful energy transition. Since its entry into the Polish market in 2007, RWE has continuously developed its green portfolio becoming one of the leading investors in renewables in Poland.

What is RWE doing in Poland?

In addition, RWE is pushing ahead with its portfolio expansion in onshore and offshore wind. The company already operates onshore wind farms in Poland with a capacity of more than 420 megawatts. Construction of the Wierchlas project (7 MW) and Nin (48 MW) are underway.

Does RWE have a green portfolio in Poland?

RWE has successfully expanded its green portfolio in Poland. The Polish Energy Regulatory Office awarded the company Contracts for Difference (CfD) for solar projects with a total capacity of 66 megawatts (MWac).

How many MW are there in Polish renewables market?

Since entering Polish renewables market in 2007 we operate almost 541 MW in onshore wind farms, the first PV plants and develop one of the first offshore wind projects in Polish Baltic Sea. Our development pipelines reach much further, so our team located in several offices comprises around 225 highly skilled employees.

Why did RWE acquire Alpha solar?

"With the acquisition of Alpha Solar, we are expanding our presence in Poland, one of our focus markets, and are taking a leading market position in solar. The experienced development team joining RWE and the attractive project pipeline are a perfect match with our existing business.
