

How important is energy security in Ukraine?

These attacks on key infrastructure have recently increased and intensified, posing a huge threat to reliable access to power, heating and communications services across Ukraine this winter. This special report lays out 10 key energy actions to reinforce the country's energy security - essential to its security overall - at this critical juncture.

What is Ukraine's energy security & the coming winter?

This special report from the IEA, Ukraine's Energy Security and the Coming Winter, provides an energy action plan for Ukraine and its partners to help the country meet its energy needs through the challenging months ahead. Ukraine's energy system has been targeted since Russia launched its full-scale invasion of the country in February 2022.

How can we support Ukraine's energy sector?

We welcome further commitments to provide funding and in-kind support to address the Ukrainian energy sector's most urgent needs, including repairs of damaged power plants and district heating systems, deployment of new, distributed power generation, emergency backup power for critical services, and passive protection for energy infrastructure.

Does Russia's attack on Ukraine's energy sector pose a threat?

A step change in the intensity of Russia's attacks on Ukraine's energy sector has created serious risks as winter approaches - requiring swift action and additional support to ensure Ukrainian citizens have reliable access to power and heating through the coming months, according to a new report from the IEA.

How dangerous is Ukraine's energy infrastructure in 2024?

With the escalation of attacks against Ukraine's energy infrastructure in 2024, the risks are significantly higher this winter. Temperatures can routinely drop below -10 °C between December and March, posing a serious humanitarian risk if heating is not available.

Does decentralisation drive energy security in Ukraine?

Despite the high investment risks, the construction of a more decentralised system has begun, increasing resilience to attack and laying the groundwork for a distinctive longer-term transition pathway. In contrast with other countries, where decentralisation has been driven by sustainability concerns, the clear driver in Ukraine is energy security.

Ukraine says Russian military hackers attempted to disrupt an energy provider in the country, but they were unsuccessful. The Computer Emergency Response Team of Ukraine (CERT-UA) claims it was ...
