

How does connect Saint Helena generate electricity?

At present approximately 75% of the islands electricity is generated from burning fossil fuel (diesel). We have 4 generators which have a total capacity of 5,400kW. Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources.

How can connect Saint Helena reduce reliance on diesel power?

Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources. Renewable energy is cheaper to produce and does not harm the environment. We currently have 12 wind driven turbines located at Deadwood Plain. These turbines provide in excess of 20% of the islands electricity.

Will St Helena have a multi-fuel storage system?

The attached report investigates the historical and current issues faced by the ongoing project to construct an integrated multi-fuel storage system for St Helena, centred on a new bulk fuel installation (BFI) in upper Rupert's Valley that would hold diesel, petrol and aviation fuel (Jet A-1).

How many generators does connect Saint Helena have?

We have 4 generators which have a total capacity of 5,400kW. Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources. Renewable energy is cheaper to produce and does not harm the environment.

Why does St Helena have less fuel tankers?

With fuel demand expected to increase due mainly to airport-enabled tourism, the limiting factor preventing St Helena from achieving economies of scale through larger, less frequent fuel tanker shipments was the volume of available ground fuel storage.

Who funded the St Helena Airport fuel system?

This system is an integral part of the contract awarded to Basil Read ('the contractor') to deliver the St Helena Airport Project. Full funding for the project, including the new fuel system, was provided by the UK Department for International Development ('the funder').

renewable energy to St Helena under a Power Purchase Agreement (PPA). A contract was signed between Connect and Sustainable Energy 1 Limited, a subsidiary of PASH, in May 2020. However, following a period of negotiation and planning, amidst changing circumstances

It is expected that any projects that result from this RFP will help meet St Helena's Energy Strategy goals. Demand 1.10. Power consumption in St. Helena in the 2016-2017 financial year was 9,721,794 kWh. This amount may be split according to use into domestic, commercial, governmental and ...
