SVC Light ® est basé sur une plateforme technologique également utilisée dans les applications de transmission d'alimentation à courant continu à haute tension (HVDC), à savoir HVDC Light ® .Le composant le plus important est le convertisseur de source de tension modulaire (VSC), équipé de semi-conducteurs puissants effectuant la commutation.

STATCOM ainsi que STATCOM hybride pour les applications de transmission d'alimentation utilisent normalement un transformateur d'alimentation entre le réseau et la barre omnibus moyenne tension. Sur ce bus, le VSC est connecté en série avec un réacteur d'accouplement. De plus, dans le cas hybride, TSR et TSC sont ajoutés en parallèle.
