

What is a saj HS2 battery?

SAJ calls their all-in-one batteries "HS2". There is a single-phase and three-phase version: Most homes only have single-phase power and so can't use the 3-phase version. Those with 3-phase homes can choose between single-phase or 3-phase battery systems. The HS2 all-in-one systems use SAJ's B2 series of higher-voltage battery modules.

What is a B2 battery?

The B2 battery is a high-voltage cobalt-free LiFePO₄ battery. With a sheet metal casing, it supports a structure compatible with wall mounting and stacking installation methods. The B2 battery is formed with battery modules, a base) and a BMS controller.

Are Saj batteries suitable for outdoor installation?

SAJ batteries are suited for outdoor installation. However, they have to be kept out of direct sunlight and rain. Also, if climate change suddenly moves in a completely unexpected direction, you'll have to stop snow accumulating on them.

Can a saj battery be stacked?

SAJ's lower voltage battery modules can also be used. When this is done, SAJ refers to the battery as B2-5.0-LV1. These modules have 4.6kWh of useable storage each and up to 8 of them can be stacked for a maximum of 36.8kWh of usable storage.

Can a saj battery be used with a hybrid inverter?

Rather than use an SAJ all-in-one H2S battery system, SAJ's B2 series batteries can be paired with a hybrid inverter. To avoid compatibility issues, this will normally be an SAJ hybrid inverter. But it's also possible to use a battery inverter, such as one from Selectronic. These batteries can be used with single-phase or 3-phase inverters.
