

Serbia leap electric solar services

Does Serbia have a solar project?

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar. Figures from the International Renewable Energy Agency state Serbia had deployed a total 137 MW of solar by the end of last year.

Where will solar power be installed in Serbia?

The Ministry of Mining and Energy and EPS (Elektroprivreda Srbije) partnered with Hyundai Engineering and UGT Renewables to drive this project. Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zaječar, and Bošnjace.

Who will build a self-balancing solar power plant in Serbia?

First, on 4 May 2023, the Government of Serbia initiated the procedure for selecting a strategic partner for the construction of 1 GW of self-balancing solar power plants to be owned and operated by the state-owned power utility EPS a.d. Beograd. The public call is expected to be published in the early summer of this year.

Why is solar energy important in Serbia?

Solar energy offers a practical, scalable solution for diversifying energy sources. This shift to solar not only benefits the environment but also strengthens the economy by fostering a local green energy supply. Serbian industries can rely on this domestic energy source, cutting down on costs tied to fossil fuel imports.

How much electricity does Serbia get from fossil fuels?

Serbia currently gets more than 60% of its electricity from fossil fuels. The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar.

How many solar plants are there in Serbia?

Serbia will soon see six large solar plants strategically positioned across the country. Key locations include Negotin, Zaječar, and Bošnjace. Together, these sites will provide 1 GW of solar energy capacity. Each plant will also have advanced battery storage systems totaling 200 MW, ensuring stable electricity flow across the national grid.
