

Shenxing lfp battery Macao

What is Shenxing battery?

Shenxing Battery is a battery based on lithium iron phosphate (LFP) chemistry that CATL unveiled on August 16 that supports ultra-fast charging. Vehicles equipped with the battery can get a 400-kilometer range on a 10-minute charge and is the world's first LFP battery to support 4C charging, CATL said in the August release.

What is Shenxing EV Superfast charging?

Today CATL launched Shenxing, the world's first 4C superfast charging LFP battery, capable of delivering 400 km of driving range with a 10-minute charge as well as a range of over 700 km on a single full charge. Shenxing is expected to considerably alleviate fast charging anxiety for EV users, and opens up an era of EV superfast charging.

Which EV brands use Shenxing battery?

On August 16, Avatr Technology, backed by Changan Automobile, CATL and Huawei, announced that it will use Shenxing Battery, becoming the first EV brand to announce that it will adopt the battery. Last week, Neta Auto struck a new deal with CATL to use Shenxing Battery, becoming the second automaker to announce it will carry the battery.

Does Chery have a Shenxing battery?

Chery and CATL also plan to offer Shenxing Battery-equipped models overseas, tapping into the European, Middle East, ASEAN, and North American markets, according to a CATL press release. Shenxing Battery is a battery based on lithium iron phosphate (LFP) chemistry that CATL unveiled on August 16 that supports ultra-fast charging.

Why should you choose CATL for a Shenxing battery?

Thanks to its strengths in extreme manufacturing, CATL has achieved the ability to rapidly transfer technology from lab to market, enabling rapid mass production of the Shenxing battery.

What makes the Shenxing plus battery pack unique?

The single-piece casing, which is an industry first, optimizes the internal space utilization, allowing the Shenxing PLUS cells to reach an unprecedented energy density level. At the system level, the Shenxing PLUS battery pack has a topological structure optimized on top of module-free CTP 3.0 technology, enhancing the packing efficiency by 7%.

CATL's introduction of the new Shenxing PLUS Battery comes just within eight months after it debuted the Shenxing superfast charging battery in August 2023. The Shenxing battery can add 248 miles (400 km) in just 10 minutes, relatively lower than the more advanced version's 370 miles. It can also yield up to 700+ km driving range.

Shenxing lfp battery Macao

Today CATL launched Shenxing, the world's first 4C superfast charging LFP battery, capable of delivering 400 km of driving range with a 10-minute charge as well as a range of over 700 km on a single full charge. Shenxing is expected to considerably alleviate fast charging anxiety for EV users, and opens up an era of EV superfast charging. Shenxing leverages the ...

On December 15, the international jury panel of AUTOBEST announced that CATL's Shenxing battery has won the TECHNOBEST 2024 award following voting by jury members from 31 European nations. This is the first time a battery product has won the TECHNOBEST award, and CATL is the first China-based company to win this title. ...

BEIJING, April 25, 2024 /PRNewswire/ -- At Auto China 2024, CATL unveiled Shenxing PLUS--the LFP battery that achieves a range above 1,000 kilometers with 4C superfast charging. Within eight months after the launch of the Shenxing superfast charging battery in August 2023, CATL has once again pushed the boundaries of LFP battery technology, ...

The battery giant said it could recover 400 kilometers (249 miles) of range in only 10 minutes, almost matching the numbers of the first battery pack to use the ShenXing. According to CATL, it ...

NINGDE, China, Aug. 16, 2023 /PRNewswire/ -- On August 16, CATL launched Shenxing, the world's first 4C superfast charging LFP battery, capable of delivering 400 km of driving range ...

BEIJING, April 25, 2024 -- At Auto China 2024, CATL (SZ.300750) unveiled Shenxing PLUS--the world's first LFP battery that achieves a range above 1,000 kilometers with 4C superfast ...

The company states, "The Shenxing PLUS battery pack has a topological structure optimized on top of module-free CTP 3.0 technology, enhancing the packing efficiency by 7%". This high energy density for LFP cells was also achieved by further developing the nanotechnology introduced with the first Shenxing battery.

According to CATL, Shenxing is "the world's first 4C super fast-charging LFP battery." A crash course on batteries and charge rates In general, the C-rate, synonymous with the C rating, is the unit used to measure the speed at which a battery is fully charged or discharged. For example, a 1C battery takes about an hour to charge from 0 ...

Shenxing Battery is a battery based on lithium iron phosphate (LFP) chemistry that CATL unveiled on August 16 that supports ultra-fast charging. Vehicles equipped with the battery can get a 400-kilometer range on ...

The Shenxing battery was touted as the most advanced lithium-iron-phosphate (LFP) battery capable of 4C ultra-fast charging. Considering that 1C means a full charge in one hour, 4C means it can ...

CATL annonce ainsi sa dernière génération de batteries LFP, appelée Shenxing, capable d'offrir une autonomie allant jusqu'à plus de 700 km. Ce chiffre n'est malheureusement pas
